

Introducing

Phoenix Vessel Technology is a growing dynamic company supplying high quality composite pressure vessels for the water treatment industry. Based in the South West region of the UK, we supply customers around the world with both standard and custom/ bespoke solutions for housing filtration and RO membrane elements. As part of the Ravago Chemicals S.A group we have the backing of a major multi-national organisation.

We pride ourselves on giving you the best customer service in the industry, so you can rely on our team to provide the support you need. Our vessels can be made to your specific regulatory requirements, eg PED or ASME X (code stamped if required) and are all pressure tested prior to dispatch.

Approach

Our whole company has a "can-do" attitude and along with a flexible production system, enables us to fulfil your orders quickly, whilst maintaining dimensional accuracy, lifetime reliability and competitive pricing.

The ability to offer you specifically designed solutions at affordable prices and viable delivery periods means we can provide the ideal service in a fast moving industry.

Technical expertise

Our engineering team have the technical expertise in material technology, production techniques and the application of our products to provide you with best solution for your project's pressure vessels.

Examples of our latest development projects are:

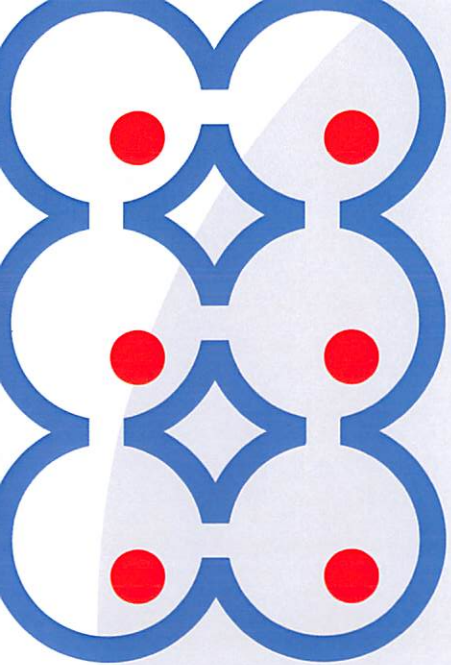

- 120bar / 1740psi to suit UHP membranes.
- 2.5" End port
- 4" End port
- 4" Side port
- 8" End port
- 8" Side Port
- 8" Grooved end NF/UF housings.
- 11" 20 bar UF Module secondary housings.
- 8" & 9.4" FEP Lined end port vessels for corrosive applications.
- 11"/5.1" Forward osmosis pressure vessels.

To keep cost of ownership low our vessels are designed to provide you with the maximum possible service life and the minimum service costs, using the best available materials and quickly removable/replaceable end fittings.

Our comprehensive spare parts stock enables us to provide you with the best possible spare parts support, normally dispatched on the same day as we process the order.

Traceability of components is of utmost importance in today's quality assurance procedures. We track the components used in our vessels from the earliest possible opportunity, so your quality plan can include traceability back to the manufacture of the raw materials used in your pressure vessels.
